Senior Product Manager | AI Monitoring & Industrial SaaS

Product leader and technical builder shipping AI-native SaaS into regulated industries (Aerospace, Defense, Medical). Proven track record of launching enterprise Computer Vision platforms and managing complex simulation portfolios. Leverages a deep technical background and personal experimentation with local LLMs and coding tools (Claude Code, OpenClaw, Figma Make) to accelerate product discovery and technical decision-making.

Professional Experience

Oqton

Senior Product Manager | Apr 2025 – Present

- **Directed the market launch of AMVero (Nov 2025)**, an AI-powered build monitoring platform for regulated industries, acquiring 5 enterprise customers within 5 months.
- **Hybrid Deployment Strategy:** Managed the delivery of AMVero across both **Cloud and On-premise** environments, ensuring feature parity while meeting the strict data security and sovereignty requirements of Aerospace and Defense clients.
- **Managed the Data Quality Loop:** Used **Label Studio** to personally label and curate image datasets in collaboration with Baker Hughes and 3D Systems partners; provided high-fidelity data to AI engineers for model retraining to reduce false positives.
- **Prototyped and deployed an internal RAG portal:** Used **Open WebUI** and local LLMs to build a support agent; optimized answer credibility by tuning Temperature and Top-K parameters and integrating proprietary 3DXpert documentation.
- **AI-Orchestrated Discovery Workflow:** Utilize **Claude Code** with **OpenClaw** as an orchestrator to compress discovery-to-spec cycles. Integrated **Jira** and **Slack** via **MCP** to ingest live user feedback, implementing model routing for specialized task-handling: **Claude** for technical/coding logic and **Gemini** for PRD drafting.
- **Delivered measurable ROI for Baker Hughes:** Achieved a 98% reduction in active monitoring time and 98% faster root cause analysis via automated anomaly categorization.

Product Owner - 3DXpert Simulation Suite | Jan 2023 – Apr 2025

- **Owned the roadmap for predictive simulation tools**, prioritizing high-value features for manufacturing process verification through direct customer discovery and data analysis.
- **Translated complex user problems into concrete product artifacts**, working deeply with engineering and data science teams to deliver failure-prediction models.
- **Led sprint planning and execution** within an agile framework, maintaining consistent delivery of enterprise-grade cloud and on-prem software modules.

Software QA Manager | Feb 2022 – Jan 2023

- **Led a group of 4 QA Engineers for 3DXpert**, directing the end-to-end release process for an all-in-one industrial software solution.
- Managed team workloads, reviewed manual/automated test plans, and defined QA timelines to approve final global releases.

3D Systems

- Software QA Manager | Jan 2017 – Feb 2022
- Software QA Engineer AM | 2015 - Jan 2017

Cimatron

- Software QA Engineer CAD | 2012 - 2015

Side Projects & Hands-on AI Prototyping

- **Agentic Development Experiments:** Actively build and test local applications using Claude Code and OpenClaw to automate coding and documentation workflows; utilize OpenClaw as a peer product manager for strategic brainstorming and roadmap refinement.
- **Local AI Environments:** Self-host and configure local LLMs (Ollama) to build an internal support portal using RAG and optimize model parameters (Temperature, Top-K).

Skills

Category	Skills
Product Management	AI Product Strategy, Rapid Prototyping, Customer Discovery (VOC), Figma Make, Jira
Hands-on AI	Label Studio, Open WebUI, RAG, ACP - OpenClaw orchestrating Claude Code, Claude Code, Model Routing
Technical	Enterprise SaaS, Cloud & On-premise Architectures, Predictive Modeling, Simulation
Leadership	Cross-functional Collaboration, Global Stakeholder Management, Agile/Scrum, Team Leadership

Education

Ben-Gurion University of the Negev | Beer Sheva, Israel

B.Sc., Mechanical Engineering | 2008 – 2012

Languages

- **Hebrew:** Native • **English:** Professional Proficiency • **Russian:** Native
